

# ATTENTION!

## Iraq / Afghanistan Service Members and Veterans

Were you involved in any **blasts** (from IEDs, mortars, land mines, grenade, RPG, etc.) or sustained a **head injury** (from a bullet, vehicle accident, or fall) and as a result felt dazed, confused, "saw stars" or were knocked out?

If yes, are you currently experiencing **ANY** of the following...

- Easily irritated or angered
- Headaches
- Ringing in the ears
- Blurred vision
- Feeling light-headed or dizzy
- Trouble with memory, attention, or concentration
- Easily confused or overwhelmed
- Problems with sleeping
- Balance problems
- Trouble with organizing activities or thoughts
- Slowed thinking, moving, speaking or reading

If you answered "yes" to the questions above, or if you have been told that you have a **Traumatic Brain Injury**, then you are invited to take part in a computer training support program that is designed to improve thinking skills and memory.

The program is part of a service project involving Easter Seals and Posit Science and is offered free of charge to service members and veterans. A disability rating is not needed to participate. **Sign up now.** The program is designed to run from a home computer with internet access and can be completed in 8 weeks. Participants who complete the program will receive a modest stipend. Participant privacy and confidentiality will be strictly enforced and maintained.

Military service members and veterans, or **friends or family members** of a service member or veteran who fits this description, please contact Easter Seals toll-free at: **866.423.4981** or email: [veterans@easterseals.com](mailto:veterans@easterseals.com)
